

Virginia - City and County Employees Chemical Spill Response Training

It's not a matter of *if* a chemical spill is going to occur, it's just a matter of *when!* Chemical handling is a requirement for many jobs in government service. From the variety of paints, solvents, and pesticides, to the fuel products we use everyday. Think about the products we transport on public highways. Even the gasoline or diesel fuel in your vehicle may become spilled in a traffic accident. *Part of being a good manager is making sure things go right on the job, and being prepared in case they don't.*

This class is also eligible for Continuing Education hours for many licenses, including water and wastewater license holders.

Also satisfies annual refresher requirement for other Hazmat training.

Do you know the rules?

Last year alone, there were over 33,000 spills large enough to require reporting to the federal government. Failure to make the necessary notifications can result in substantial fines. Fuel products require reporting in some situations if only one drop is spilled. Do you know what they are?

A school employee was awarded \$289 million for exposure to chemicals on the job. Do you know what protective gear is required?

An employee placed a zip tie on a fuel dispenser handle, resulting in a \$500,000 cleanup and \$90,000 fine. Do you know the rules that apply?

EPA issued a \$66,000 fine for simply not reporting a chlorine leak. Do you know when you have to notify authorities?

OSHA and EPA strictly regulates who can respond to chemical releases. Without spill response training, your employees will not be allowed to assist you in cleaning up a chemical spill.

The majority of all spills are less than 50 gallons, yet may cost \$10,000 or more to clean up when using an environmental contractor. Most cities and counties have all the necessary equipment, but employees **must** have the proper training.

Trained employees can respond in a matter of minutes, instead of hours that most environmental contractors require to get to your site.

Sigma Consulting and Training, Inc., is offering chemical spill response training in your area to prepare your employees to respond to an emergency. The training satisfies the OSHA requirements for emergency responders, and includes eight hours of training covering: Spill response procedures, decontamination, personal protective equipment, respiratory protection, chemical storage and handling, and more.

Registration fee for the course is \$150 per employee, four or more employees are \$125 each. This includes textbooks, DOT emergency response handbook, and handout materials. Laminated wallet card and certificate of training will be provided after the course.

The course instructor is a nationally recognized speaker and has trained employees from more than 300 companies, along with federal, state, and local agencies. These include the U.S. Army and Navy, Kennedy Space Center, and U.S. Dept. of Justice. The instructor also meets "Master Trainer" qualifications with the U.S. Dept. of Homeland Security.
